*Automotive
Audio Bus*

ITD 1024 is an off-the-shelf solution for A²B®, an emerging automotive audio bus. In combination with a comprehensive set of software tools, ITD 1024 allows for rapid testing of various A²B® components such as audio speakers, amplifiers, microphone arrays, sensors, and actuators.

A²B® FEATURES

- 50 Mbps data rate
- Up to 32 independent up- and downstream channels
- Single master, multiple slave (up to 10) line topology
- Up to 15 m between nodes and up to 40 m overall cable length
- 44.1 kHz and 48 kHz sampling rate, up to 32-bit audio

ITD 1024 FEATURES

- Master or Slave node simulation
- Compatible with AD240x, AD241x, AD2442x and AD242x transceivers
- Local and phantom power (up to 300 mA) support for slave nodes
- Configurable phantom power voltage to simulate the specific nodes in the A²B® chain (sw-option)
- Node-level I²C device handling
- Interrupts support
- GPIO handling
- A²B® diagnostics and error management support
- Selectable audio interface: Internal TDM interface, Analog audio or External audio

INTERNAL TDM INTERFACE FEATURES

- 32-bit multichannel TDM generator/recorder
- 16 output channels, 16 input channels
- Signal generation: sine or square wave with programmable amplitude, frequency and duty cycle (sw-option)
- Signal recording: simultaneous recording of all channels (sw-option)

ANALOG AUDIO INTERFACE FEATURES

- 24-bit multichannel In/Out audio codec with TDM interface
- 8 input channels, 8 output channels

DSIO (EXTERNAL AUDIO) INTERFACE FEATURES

- Multichannel TDM interface
- Active (Master) or passive (Slave) TDM configuration

SDK FEATURES

- SCPI protocol for external device control
- LabVIEW API for automated test integration
 - NI LabVIEW 32- and 64-bit support
- Quick and easy A²B® network configuration with AD SigmaStudio™, examples and templates
- ITD 1024 Management Utility
 - Search devices in local area network
 - Configure network parameters
 - Perform software updates

TECHNICAL DATA

ITD 1024

Interfaces

A²B®	Industrial grade connectors
PC Communication	Ethernet (RJ 45)
Audio	Digital serial I/O interface 8 differential analog Outputs (D-sub) 8 single-ended analog Inputs (D-sub)
Reset	Button Additionally, electrically triggerable

Power Requirements

Voltage	12 VDC
Current (max.)	1.25 A
Power Supply (included)	100-240 VAC / 50-60 Hz

Physical Specifications

Dimensions	170 mm x 55 mm x 121mm (W x H x D)
Weight	830 g

INTEGRATED ENDNODE SLAVE

- 2nd integrated A²B® chipset for end node simulation
- It is possible to measure the phantom power from the previous device in the A²B® chain
- The additional A²B® end node is ideal for additional testing of the A²B® port on a DUT
